Sample of Map Sketch for Museum/Historic Site Signs

The map sketch is vital in determining the exact location of your facility and the eligibility for signing. The sketch need not be of engineering grade quality; but it should clearly show the location of the facility, all major intersecting roadways, landmarks, and mileposts, as well as the mileage/distance from the highway to the facility. Also indicate any hills, trees or any other major obstruction that might create a motorist safety problem. The clarity of the map may affect the time needed for the qualification review. Please be as accurate as possible to avoid delays. Mapquest is a great resource: www.mapquest.com.

Note: Eight (8) highway skip lines equal 300'.
